Town Receives The First Instalment On The Second \$50,000 Government Loan

Council Is Informed At Regular Meeting Held On Monday Night—By-Law Governing Building Permits To Be Amended Forcing the Town To Pay Interest On Permit That Has Been Obtained Before Commencing Work—Matter Of Rolling The Runways At Airport Was Discussed At Meeting.

The council was informed by Mayor Lawlor at the regular meeting on Monday night that the Town received the first instalment, \$12,500 on the second \$50,000 two per cent government loan, which will be used for extension of water and sewerage lines.

The following were present besides the Mayor: Aldermen Swallow, Smart, Wilson and Patterson.

The following accounts were then passed for payment:

General	\$574.75
Interest, Relief	1.38
Child's Welfare	14.25
Unemployed	174.50
Labor	133.30

Total \$904.93

The matter of rolling the runways on the airfield was discussed at some length and reference had been made to conversations between business men and councillors with J. A. Bell, manager of the airfield, on Friday, and following reading of a letter from Grant McConachie, president of Yukon-Southern, in which he suggested the rolling of the runways to make them more suitable for the landing of both ski and wheel planes.

The secretary was instructed to write Mr. McConachie to take the matter up further with him.

It was the opinion of the council that the Town should make a donation of \$1,000. This would be prepared for empowering the council to make such donation.

A letter was read from the Department of National Defence asking the Mayor for the offer of the use of the airfield to be used in any national defense.

The question of rolling out building permits took up a considerable portion of the time of the meeting.

Councillor Swallow gave an opinion that the contractor should make certain that a building permit has been obtained before commencing the work. It was also decided to avoid delays in taking out permits and eliminate a lot of dissatisfaction. The by-law will be amended to embody this.

Speaking to the question, Councillor Porteous said that he thought the present system was wrong. For instance, it was proposed to take out a permit for alterations or improvements at an estimated cost of say \$300, and when the work was finished the cost might be double that amount.

He thought that there should be a permit where the exact figure can be placed when the work is completed.

The idea will also be embodied in the by-laws by the By-laws.

Councillor Porteous drew attention to the fact that there were some 60 or 75 loads of logs at the airport which the town can use.

Councillor Smart thought that the

wood should be taken into town. It was decided to advertise for tenders.

The secretary was instructed to put up a by-law in the principal place of business street, to keep the sidewalk in front of their respective properties clear of snow.

Councillor Smart thought that some provision should also be made for keeping the sidewalks on other streets, particularly residential sections, also clear of snow. This was considered a rather large order at the present time.

Councillor Watson, chairman of the Rink committee, reported that the necessary improvements to the rink had been ordered done. He further reported that the solicitor was drawing up an agreement between the Town and Athletic Association under which the latter will operate the rink for the season.

Dysart Returned To Power By a Small Majority

SAINT JOHN, N.B., Nov. 21.—Returned to office for a second term, Premier Dysart and his Liberal administration were confronted today with an opposition which had fought them to a standstill in the last session of the Provincial legislature. Conservatives gained 16 seats from the government party. The final standing was: Liberals, 27; Conservatives, 21.

Red Cross Branch Formed at Rycroft

YRCROFT, Nov. 21.—On Sunday afternoon a meeting was held in the Rycroft hall for the purpose of organizing a Red Cross branch.

Miss J. M. Murray, elected president; Mrs. Lytle, vice-president.

Mrs. Lytle, secretary; and Mr. T. H. Stedman, treasurer. Mrs. Gudgeron and Mrs. Carter were elected.

It is proposed to make a canvas of the district to give a record of the various organizations which contribute to the work of the National campaign.

It is hoped there will be a generous response to this worthy cause. We believe this is the most unselfish and worthy cause, for the Red Cross aids the needy, friend or foe.

'Whoopee' Carnival' Held At Rycroft Huge Success

YRCROFT, Nov. 21.—The Whoopee Carnival was an unqualified success.

Rycroft's new hall, built to assist in their appreciation of the generous response of the public, and not forgetting The Herald-Tribune and CFCF, did their best.

The games in general were quite popular.

An amateur operator of the Bingo called his voice so lustily that it was struck for a few days.

The spuds were won to John Dixie, the first evening, while Shirley Kerr of Spirit River, was the winner of the sport sweater on the second evening.

THE HERALD-TRIBUNE
AN INDEPENDENT WEEKLY
NEWSPAPER

Owned and published by B. E. Yule
Geo. A. Duncan, James Duncan
and Arthur Johnson
Published every Thursday at Grande Prairie, Alberta

The aim of The Herald-Tribune is to "cover" all news and topics; also to aid in the development of the Peace River Country, and to bring to the people this northern inland empire's many advantages as a home-land. All news is printed in its original language. The paper's opinions are expressed in its editorial columns.

Local advertising rates are reasonable but should not be too lengthy nor only propaganda. A name may be used, but when advertising a writer using his own name. Proper names must also be signed when using a pen name. Use of initials or signature but as evidence of good faith in publishing a communication. The Herald-Tribune does not imply agreement with opinions expressed.

Legal and other advertising rates furnished on application.

Subscription Rates:
One Year, in British Empire..... \$1.00
One Year, in United States..... 2.00

Along the Trail

By J. B. YULE

AN INDOOR HYDE PARK

Practically every evening a group of men, mostly young soldiers of the corps, agricultural problems with which the town men are not so familiar. Judging from opinions voiced at these sessions there is a decided difference of ideas between the real dirt farmer and those who farm under an electric light.

We have an electric light farmer clears the brush, and prunes the seed is sown and the crop harvested at a speed that would make one wonder.

Naturally the war is commented upon. When this subject comes up the discussion immediately revolves itself into the various types of aircraft, and all angles of the war are considered. Of course there are no doubts expressed as to the Allies winning the war.

As there is no money connected with the various offices, the ministers sit idly by. Of course the money is not forthcoming.

Up to the present the Speaker of the House has been appointed. This detail will be looked after in the near future prior to the heavy winter session.

Locally all jokes aside, the sessions are most interesting and the meetings are a pleasant and profitable way of putting in a few hours. The speaker will be soon to announce the topics of discussion at future meetings.

STONE TAKES FREAK COURSE
While rambling Along the Trail on Sunday evening I picked up a rather unusual story told to me by an eye witness.

On Saturday a truck was passing close to a small pile of gravel. Bolt when it started in motion, a stone about the size of a man's fist. After traveling about 40 feet the rock went through a front window in Morrison's Cash Store, about four feet from the ground. Barely missing the window it hit the floor and was stopped in its wild career when it struck the back wall of the store.

One of the strange things about the incident is the opinion expressed was that the glass was not split as one would expect, the hole being cut clean as though made by a bullet.

Dad's Notions

By E. S. Stanley

Sometimes a truth you had known strikes you with a force as though it were new to you. That was my experience when last week I came upon a book entitled "Education" by White, and browsed through its pages.

"The seed has in itself a germination principle," I read, "yet if left to itself it will not have the power to spring up." Man has a part to play, but there is a point beyond which he can accomplish nothing."

"When you want to refresh the thirsty fields, the sun must impart warmth; electricity must be conveyed to the buried seed." The life which is in the seed is implied. He alone can call forth. Even seeds sleep and every plant develops by that power.

"So parents and teachers are to labor; expecting a harvest from the seed they sow."

When we are discouraged we should remember that buried there is a point beyond which he (we) cannot go." Like a gardener in his work, we are compelled to co-operate with other forces in training and educating the child.

The gardener prepares the ground and plants the seed, but then he must stop till the sun gives the power to cause the seed to spring to life and grow. If the seed doesn't grow the gardener is bound to do his propery preparing the ground, or in preparing good seed, or in watering it. If there is any carelessness or neglect it lies with Nature, but with the gardener himself.

Thus it is with the heart-garden of man. We should prepare the soil with love and sympathy, the seeds (ending) select and sow the good seed of noble aspirations, high ideals and virtuous purposes; warm and water the seeds with the love and companionship. That is about all we can do till unseen forces cause the invisible elements of character to sprout and grow.

If we see wrong growths appear it is well for us to carefully consider "how to pull them up." We can't leave the service on completion of their short service term quite inadequately equipped both in experience and knowledge to carry on. Just one example of this inadequacy — how many A.F. pilots know enough of aircraft control to fly a plane which had enough of poor weather flying experience to take even a passenger in a Moth on a journey when the visibility at the point of departure

is only 100 feet? We may yet attain success, but we may not succeed. That is why Mr. A. an

**The A. T. A.
CORNER**

THE HOME CAN HELP

By H. C. MELNESS
District Representative of A.T.A.
for Northwest Alberta.

This article is intended primarily for the parents. The A.T.A. hopes that the material in the column, it will be possible to further cooperation between the home and the school. We hope that the parents as well as the teachers will realize that the Association plans to present the same at school and in later life. The same must learn at home to respect others.

Other qualities for which a child should be trained at home are cleanliness, neatness and orderliness. These qualities are accustomed to doing practically as they like with the property of their brothers, sisters, parents and themselves. Any parent may wonder that they expect to do the same at school and in later life. The school must teach at home to respect others.

In a broadcast given during the recent Education Week, Mr. C. Johnstone, of the Ministry of Education Division, under the title "Your Problem and Mine," gave a number of valuable suggestions regarding some of the characters the children develop as they act out in their play the characters they later become — the devils, the trigger-men, his heroes — familiarize him with gun, baton, knife, etc. Do they play games like those that are good that your wish will be fulfilled.

Our group of schoolmen turned out to the public enemy No. 1 who was shot to death in capture; a narcoleptic smuggler; a burglar; and the owner of a gambling house. And this is what they did. While they acted out in their play the characters they later became — the devils, the trigger-men, his heroes — familiarize him with gun, baton, knife, etc. Do they play games like those that are good that your wish will be fulfilled.

Just as food is the material with which the body grows, so is the material with which character is constructed. No structure can be better than the material that is used.

Powerful is the influence of thought upon the character at all times, but especially so just before dawn, when to sleep is a natural instinct. The booklet called "Self-Help Manual" by a psychologist, Hilton Ira Jones, Ph.D., "Reveals all the impressions, the passions and fears which dominate you as you fall asleep are things which stay with you all day and making you all through the night."

"You had better rile the child within an inch of his life than ever to let him go to bed without your blessing."

Then quotes Ralph Waldo Emerson in his speech to students: "The world is full of beauty, but it is not so familiar. Judging from opinions voiced at these sessions there is a decided difference of ideas between the real dirt farmer and those who farm under an electric light."

With the electric light farmer clears the brush, and prunes the seed is sown and the crop harvested at a speed that would make one wonder.

Naturally the war is commented upon. When this subject comes up the discussion immediately revolves itself into the various types of aircraft, and all angles of the war are considered. Of course there are no doubts expressed as to the Allies winning the war.

Up to the present the Speaker of the House has been appointed. This detail will be looked after in the near future prior to the heavy winter session.

Locally all jokes aside, the sessions are most interesting and the meetings are a pleasant and profitable way of putting in a few hours. The speaker will be soon to announce the topics of discussion at future meetings.

THE CAREFUL DRIVER
Did you ever figure out how far you have to drive to pass another car? Assuming your speed is 40 miles an hour, and allowing safe distance for turning and coming back into your own lane, you must travel 600 feet before the vehicle you are passing goes 400 feet. This is about the same as passing at a stationary line of 18 trucks each 50 feet long, standing bumper to bumper.

If the vehicle you want to pass is traveling 40 miles an hour and you pass it in one-half mile, you will have to travel over 1,000 feet. That is because there wasn't a cent for toys they made their own. And after two years these children, now grown, recall that happy Christmas season.

After leaving the leave we leave the road and the power where we it is will not fail to produce results.

AERONAUTICAL TIT-BITS
By J. W. Neil

AVIATION DEVELOPMENTS OF THE FUTURE

By Nigel Tangye. Mr. Tangye is Air Correspondent to the Evening Star, and has often broadcast on aviation. (Reproduced by permission of the G.A.P.A.N. Journal.)

In the earliest time that an interest in aviation existed there was little information available on the vast subject suggested by this title. In the very limited space available a resume of that of the existing folly of the world to pass an automobile or another truck on a hill or on a curve where vision is obstructed.

And now straightway for another time there is no information on aviation development without a constant supply of trained personnel, a master in which the guild of air pilots has a special interest. There is no question that a direct crossing will not be the ultimate service in view of the vast economic advantages of aerial transport.

There is no question that airmen, besides having hundreds of flying hours to their credit, must be versed in the intricacies of modern air transport organization and operation?

One looks naturally to the Royal Air Force for assistance, and what does one find? In the year 1938, leaving the service on completion of their short service term are quite inadequately equipped both in experience and knowledge to carry on. Just one example of this inadequacy — how many A.F. pilots know enough of aircraft control to fly a plane which had enough of poor weather flying experience to take even a passenger in a Moth on a journey when the visibility at the point of departure

THE HERALD-TRIBUNE

as soon as he is old enough to do them, and to make him definitely responsible for certain tasks. The parents must, of course, make sure that the child is doing his work effectively, and trying to do it with a pride in work well done. That chores do develop such qualities in the boy and girl is borne out. I believe, by the example of honest men, that a boy can be high and led the way.

But if you push your child to be an outlaw, to have him to pistol and a mock bomb and set him at playing "stick-em-up." Give him hold-up stories to read, and radio talkies, as well as all dramas of violence, make the "trigger-men" his heroes — familiarize him with gun, baton, knife, etc. Do they play games like those that are good that your wish will be fulfilled.

Our group of schoolmen turned out to the public enemy No. 1 who was shot to death in capture; a narcoleptic smuggler; a burglar; and the owner of a gambling house. And this is what they did. GOODFARE NEWS

On Wednesday, Nov. 29 at 7:30 p.m. a speech will be broadcast over CFCAC, Calgary, and CJCA, Edmonton. Mr. Talbot, president of the Alberta District Farmers Union, will deliver this address to the district on Wednesday.

Rev. Norman Calland and Dr. Gaudin of Beaumont were callers in the district last week.

Mr. Millar of Edmonton made a trip to the district recently.

Mrs. Shetrault entertained the Legion Club last Saturday. It was decided when the next meeting would be held.

James Allen and Dr. Miller of Beaumont were invited to speak on the importance of personal hygiene.

John Campbell, representing the Royal Engineers.

Scout Fire Rescuers Demonstrate

Methods of rescuing unconscious persons from burning houses were demonstrated by the Scouts of the Stratford, Ont. Scout Troop, in connection with presentation of a Scout Fireman's proficiency badge.

Cubs and Scouts Top-Ranking Pups

One of the teachers in a Rouyn Scout recently received the boy of the year award for his services to the Boy Scouts of Canada Wolf Cubs, stating that a good majority of her top-ranking pups were from the Hodson lad camp to spend most of the winter.

MOUNT VALLEY

MOUNT VALLEY, Nov. 21.—The mount has been here several times but has disappeared again just as mysteriously.

Mr. Patterson has now taken up residence on the MacDonald farm. Clifford Nichol is renewing old acquaintances for a week or so. We are all glad to have you back "Snowball."

Marion Cunningham and "Uncle Tom" went to Grande Prairie last week.

Herman and Wes Goodman were working in the Sexsmith district.

Andy Moore went sliding minus the snow and sleighing when his team in the mud.

The W. I. bazaar and dance in the Rio Grande hall was a success. First prizes were won in folk dancing (Nancy the doll) Len Williams; (fruit cake) Linda Dowd; (treasure hunt) Ed. Moon; (Aigrette) H. Deipdael. Congratulations to all.

Don't forget the dance at the Rio Grande hall on December 1st aid the R. G. school Christmas tree.

Mr. Martin, principal of Four Mile School, started a collection for a School Inspector, Mr. Stelton, was also visiting schools on Nov. 14.

And here are the commands which they drew up for teachers:

1. Thou shalt be impartial and treat all children alike.

2. Thou shalt understand children.

3. Thou shalt be patient.

4. Thou shalt maintain good discipline in the classroom.

5. Thou shalt have a good sense of humor.

6. Thou shalt be kind and good natured.

7. Thou shalt have a pleasing personality.

10. Thou shalt be a friend to thy pupils.

From Wisconsin Journal, Nov. 1938.

EAGLESHAM NEWS

EAGLESHAM, Nov. 16.—Old man Ernest is keeping the wood haulers on the jump getting out firewood.

Mrs. Campbell has been in the London evacuation, of 70 blind and invalid people. The Scouts and the Girl Guides immediately started a hospital, and bore them to the improvised sleeping quarters. They secured bedding, arranged for food, and did everything else possible to make the helpless evacuees comfortable.

Canada's MECHANIZED ARMY OF AGRICULTURE BACKS THE ALLIES FIGHTING FORCES

Nearly always it is the forces behind the scenes that exert the greatest influence in momentous issues.

The greater determining factor these deeper sources of vital supply become.

In the present titanic struggle to assure a continuance of the freedom of Democracy, the vital sources of the British and the French will undoubtedly again display the courage and skill which have in times past brought them high honor and victories.

On them we can depend, but just so long as the base continues to furnish food and munitions. "An army marches on its stomach" was Napoleon's way of expressing it, and just as surely is the morale of the civilian population maintained at the dining table.

On Canada—the greatest agricultural country in the Empire—does Britain place her dependence for foodstuffs. Our wheat and other grains, our livestock and dairy products, our fruits and vegetables, take on a new and very vital significance and the highest efficiency in their production is essential for the national welfare.

It is fortunate that today, back of a mechanized army is a mechanized agriculture—Canada has the most highly mechanized farming in all the Empire, with power machinery for almost every farm operation, giving greater efficiency and saving time and labor, producing greater crops with fewer men.

The leadership shown by Canadian implement makers in the developing and making available of power-farming equipment of exceedingly high efficiency, so that Canadian farming might be made more profitable, now equips it to render the utmost in the specific contribution that Canada is called on to make, and can make, to the success of the Empire's cause.

Massey-Harris takes pride in the part it has played in the mechanization of Canada's farming and is eager to serve unselfishly and unstintingly in the field of its specialized knowledge and experience to aid agriculture meet the needs of the Empire.

Canadian Agriculture—The Empire's Life Line

THE SERVICE ARM OF THE CANADIAN FARM

THURSDAY, NOVEMBER 23, 1939

IMPORTANT ADDRESS

On Wednesday, Nov. 29 at 7:30 p.m. a speech will be broadcast over CFCAC, Calgary, and CJCA, Edmonton.

Mr. Talbot, president of the Alberta District Farmers Union, will deliver this address to the district on Wednesday.

Rev. Norman Calland and Dr. Gaudin of Beaumont were callers in the district last week.

Mr. Millar of Edmonton made a trip to the district recently.

Mrs. Shetrault entertained the Legion Club last Saturday. It was decided when the next meeting would be held.

James Allen and Dr. Miller of Beaumont were invited to speak on personal hygiene.

John Campbell, representing the Royal Engineers.

Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright
"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

A man who has a half section free of debt can live through pretty hard times.

Some of us who farm hilly land will soon have to decide which we prefer—grain or pulses.

On a well-managed farm each vehicle and implement is ready to be hauled onto prompt in season.

Mice galore are reported by a returned man who goes on in hope that the rodent control and rats may be kept out of the national wheat chest.

An unusually deep layer of wet straw covers all the early-threshed straw piles this year. Unless this layer is removed before it freezes too hard, considerable inconvenience will be experienced in forking straw from the piles this winter.

Thousands of tons of chaffy straw have been rotted this autumn on the tops and around the bases of sprouted-out piles. A man on the prairie who has never had his hay prevented much of this, and he would not have had to spend more than half his time on the pile, either. If a man has a hay wagon, a blower greatly lessens the unpleasant work on the stack, but some

forking is necessary for best results.

"There are still many noxious weeds which could doubtless thrive in the Peace River district, but we have not been detected," advised Herbert Grob, Botanist in charge of vegetation surveys and field biology at the Plant Protection Division, Russian knapweed and field bindweed, among a few of the worst, are worth keeping out. "Why not," he asks, "set up the machinery of some vigilance effort with regard to these and drive it against them?"

For that matter many of those that have slipped in are still absent from the territory and should be halted where they are.

Typical symptoms of boron deficiency in cereal fields have been observed in various parts of the continent and have been eliminated, it is said, by the application of 40 to 60 pounds per acre of lime.

The effects on boron-deficient soil has a distinctive yellowish appearance, with the blossoms being absent or

R. F. Gibson

Parasitic Wheat

I understand that a research is being done in Canada looking to the breeding of a perennial wheat. Can you give me particulars? A.G., Hungary.

Ans.: The possibility of developing a wheat-like Agropyron species was first investigated by Russian plant breeders.

Successful crosses were made between Agropyron and Agropyron species, and the element jumped the growth two or three hundred per cent, while effecting a marked change in a very short time.

There is more nitrogen utilization than nitrogen, phosphorus, potassium and lime. The minor or trace elements are demanding study as well.

The Removal Of Flourine From Alberta Waters

It seems clear, report O. J. Walker, G. R. Finlay and W. E. Harris, in the Canadian Journal of Research for October, 1938, that the problem of removing mottled teeth (caused by excess flourine content of well water) has reached a point where adequate methods are now available.

In addition to those proposed by others, different forms of hydrated alumina as well as aluminum sulphate are added to the list. It is necessary, however, to make careful surveys of endemic regions in order to advise the residents regarding the most effective prevention.

Such surveys have been made in some regions, but, owing to lack of funds, have not been made in other provinces of Alberta. Since persons from other provinces have suffered suffering from mottled en-

amel.

Crosses have been successfully made between wheat and the two Agropyron species *A. glaucum* and *A. elongatum*. On growing the hybrid seed, however, it was found that the seeds involved in the cross were completely sterile while hybrids involving *A. elongatum* were normally fertile. The Glaucom hybrids attempts have been made to overcome the sterility by back-crossing and by the use of colchicine to obtain a chromosome number of 28.

Other methods are developed and some are developed in sand and silt soils where temperatures and moisture are controlled.

Canadiana

More Mortgages

Edmonton.—Business prospects in the western provinces with record grain crop and particularly the location of Morley Aylsworth, general manager and director of Huron and Erie Mortage Corp., Financial conditions in Saskatchewan and Manitoba particularly are excellent he said. Mr. Aylsworth is inspecting western branches of his companies.

Program for Wheat

Edmonton.—Wheat marketing program in war time was outlined and approved at the annual meeting of the Saskatchewan wheat pool. Under the new arrangement completed, the quota to be given to the Canadian wheat board. The importance of the future market for wheat was discussed. As far as Canada's wheat it was suggested that speculative trading be suspended and the futures market be closed. The Canadian Red Cross had directed direct negotiations with the United Kingdom to establish the price in proportion to other commodities. Adoption of 1926 price level was urged.

Youth Training

Ottawa.—A youth training program were announced recently by Hon. Norman McLarty, minister of labor. Projects will be carried on in each of the 400 centers for which 40,000 young people and will build up the physical condition and morale of Canadian youth. Besides vocational training, citizenship, industrial training will concentrate on occupations where there will be an increased demand as a result of the war. The government offers to carry out a survey of available labor is being made to help in determining the type of training.

True Patriotism

Montreal.—Canadians must put aside the pursuits of peace and devote the whole mind to war, said Gen. Sir A. G. L. McNaughton, commander of the first Canadian overseas division in an address here. The general said that the alternative was one of being submerged.

"Unpleasant, distasteful and wholly undesired, the situation is upon us," he said, "and no greater effort can be made by bemoaning our fate and seeking to place blame on those who have misguided the public opinion or who are the cause of the war to stabilize the safety of democracy."

Hoarding Defended

Ottawa.—Buying wave which started with the outbreak of the war will continue "for a month or two," according to a Dominion government survey. Among the necessities of food and other supplies it is not regarded as hoarding unless a scarcity of necessities of life results. The government said that the prices and trade board would take the necessary steps to restore normal flow of supplies.

New Prospects

Ottawa.—Inquiries as to the ability of Canadian manufacturers to supply new export markets were submitted in a petition published by the department of trade and commerce. Australia is seeking new sources of supply of raw materials supplied by Europe and southern China wants commodities formerly obtained from Germany. Products concerned are chemicals, minerals, newsprint and glass.

Reason for Delay

Owen Sound.—It might be some time before the Royal Canadian Air Force, based in the United Kingdom, would need Canada's great stores of wheat, declared Hon. J. Gardner, Dominion minister of agriculture. Great Britain, he said, has so far as this Dominion possesses the best storage facilities in the world and is now taking advantage of supplies that might later be released.

One Way or Another

Toronto.—Representatives of the Alberta Jumbo Guineafowl and Harestein Breeders' Associations meeting here warned that unless the price of cream for butter-making could be raised, the cow production and dairymen will soon swing to more remunerative lines of farming. This would soon reduce supplies of butter and cheese, thereby causing an upswing in prices.

Government Order

Ottawa.—Canada's coal and coke industry will be licensed after Dec. 1, under the wartime prices and trade board. No producer, manufacturer, exporter or distributor will be allowed to operate without a license under the new order. The licensing has been delayed to provide the government with information concerning the industry, to

assure an adequate distribution of coal, and to protect the public against undue advance in prices."

SUFFICIENT FOOD IN BRITAIN

British interests have notified the United States that will make no large scale demands on their products for at least a year, possibly two. They have sufficient supplies within their home market period, and thereafter will buy from their dominions in return for the latter's gratifying rally round the mother country.

Edmonton High-Lights In News

EDMONTON, Nov. 21.—Alberta's Capital City this week experienced one of the quietest civic elections held in its history. Mayor Fry and his entire slate of candidates won easily without being challenged by any other contestants.

The war as a major attraction was blamed for public apathy in the contest.

Of far-reaching importance to all persons on military service and their dependents is the order of the day declaring a moratorium on soldiers' taxes and debts, announced as signed by the Lt. Governor.

The order, issued by the commandant of the Canadian Forces, states that a soldier's affairs if he so wills.

Regulations are extensive in effect and depart from the usual rules of procedure, simple and inexpensive way for a soldier to have his estate managed by the public administrators during his enlistment," said Premier Aberhart.

The Premier added that legislation is required to make the regulations effective. The bill will be brought down at the regular session.

In the meantime, the order-in-council gives immediate protection with a special session.

The Russian Aviation journal publishes an estimate that the Soviet forces shot down 600 Japanese planes in last summer's battle in Mongolia.

Foreign Secretary Viscount Halifax announced in the House of Lords the government has decided to offer \$400,000 to aid the 120,000 Polish refugees in Hungary and Rumania.

Soldiers of beligerent nations were entitled to compensation for personal waters, ports, harbors and anchorage except in case of emergency by a government decree.

The ministry of information announced the Royal Air Force film, "The Lion Has Wings," showing the work on the Kiel canal by British flyers, is being sent to the Dominion.

Adolphe Max, burgomaster of Brussels impriisoned by Germany during the first Great War and who had held office continuously ever since, is dead, at the age of 70.

The Egyptian government has announced that 100,000 tons has been received for sale to Great Britain. About 15,000 tons of Egyptian cotton, about one-fifth of the total Egyptian crop.

Dr. F. J. Comboy, acting mayor of Toronto, said he believed at least 25 new airfields will be constructed very shortly in Ontario in connection with the proposed empire air training scheme in Canada.

The first preliminary estimate of a new record Russian grain harvest of 114,600,000 tons indicated to economists observers the Soviet might export grain to Germany without drawing heavily upon her reserves.

HOLLAND RECLAIMS 100,000 ACRES FOR CULTIVATION

Holland has reached another stage in its big job of reclaiming land for agriculture. A fifteen-mile dyke, enclosing 100,000 acres of land for Ark Island, which is a former part of the mainland, is a small part of the dyke to be yet finished then the water will be pumped out. It will take another 3 years before the land reclaimed will be ready for cultivation.

ST. CECILIA'S YOUNG LADIES SHOW KEEN INTEREST IN HERALD-TRIBUNE PLANT

The following young ladies of Rycof paid the Herald-Tribune office a visit on Saturday: Misses Mary Henderson and Alice Zahara, and Mrs. Wm. Chisholm. They spent some time in a printing office and they took a keen interest in the mechanical department.

In the steel industry, "whiskers" are the thin fins of steel which cling to the point of a nail as it comes from the nail machine.

There is no fruit richer in vitamin and mineral content than the apple.

Survey of foodstuff costs is being made by the relief branch of the public welfare department of Holland. W. W. Cross stated last week. Object is to insure relief recipients enjoy an improved food supply.

The survey is made quarterly when reports from R.C.M.P., municipal secretaries and other officials are consulted to determine the cost of living. more care is being taken in the calculation for the next three months will be based on an accurate estimate of recipients' needs.

Order closing of Wainwright buffalo park and slaughtering of animals in all parts until it was disclosed that Elk Island park is to be doubled and Wainwright taken over by the military authorities.

Here and There

The British army has advanced 7,000 men from the ranks to be trained as officers since the war began. War Secy. Horace Belisha told the House of Commons.

Fifty-eight war charity funds, revealing widespread desire to help in the war, have been registered with the secretary of state department it was announced.

The spectacular increase in steel production has added approximately 75,000 workers and \$12,000,000 or more to the industry's payroll in the United States within the past three years.

British optimism is still on top. A small town has made arrangements for a cowling tournament to be held next summer.

The government of India has prohibited the import or export of gold officially.

Oriental gunners held up an armament in an international meet held at Shanghai and escaped with \$100,000 Chinese money.

Lieut.-Col. A. G. Drew urged widespread federal investigation of Nazi and Communist activities in Canada when he addressed the St. Catharines chamber of commerce.

Mr. and Mrs. William S. Gould of Keweenaw, Mich., received a gift from King George and Queen Elizabeth on their 71st wedding anniversary.

Wm. C. McDonald of San Francisco, who recently visited Warsaw on behalf of the Queen, was welcomed by the city's mayor and other officials.

The Russian Aviation journal publishes an estimate that the Soviet forces shot down 600 Japanese planes in last summer's battle in Mongolia.

Foreign Secretary Viscount Halifax announced in the House of Lords the government has decided to offer \$400,000 to aid the 120,000 Polish refugees in Hungary and Rumania.

TEPEE CREEK BRANCH OF CANADIAN LEGION HELD VERY SUCCESSFUL DANCE

The Tepee Creek branch of the Canadian Legion held a very successful Armistice dance at the North Kinsmen Hall on Saturday night last, there being a good crowd present. Sexsmith was well represented, and there probably would have been more had the band been in better condition. Capt. Blake, who is president of this branch, gave a short talk and then asked those expected to receive form from the military authorities regarding enlistment, and when these arrived, anyone desiring to do so could do so with him. We understand this applies to all other presidents of Legion Posts. Capt. Blake also spoke of the good work done by the Legion for the Red Cross. One puzzling thing was just what would send some of the ladies from Moon Star and Kinsmen Hall in gales of laughter every opportunity. They tried to find out the cause, but were unsuccessful. Laugh well served armchair midnight, after which Sexsmith was kept up until about five in the morning. Kirstein's orchestra of Sexsmith provided the music.

WEDDING BELLS RING JOHN — PETERSON

A quiet wedding of importance took place in Sexsmith last Thursday afternoon at the home of the Lutheran Minister, Rev. Nordmark, when Oliver Peterson and Marie Peterson were united in the bonds of matrimony. The bride was a sister of the bride, Gladys, and the groom a son of the popular John Peterson, brother of the bride. After the ceremony, the newly wed went to Grande Prairie for a few days. On Sunday evening a number of friends of Mr. and Mrs. Johnson gathered around their home just north of Sexsmith and staged an affair of their own. The couple were finally invited in and given a lunch. Congratulations to the happy couple, and a wish that they have a long and happy life together.

OTHER HAPPENINGS

Mrs. Bob Brison, of Watervans, and her Grandmother, Mrs. Brison, arrived on Sunday, see her mother, Mrs. Andy Johnson, who is seriously ill at the Grande Prairie Municipal Hospital.

Mr. George McQuilty, who has been at the Waterways for the past summer, arrived home on Monday for the winter.

The Ladies Aid of the United Church will hold a bazaar and tea on Friday, December 1. This will be a good time to buy Christmas gifts, as there will be a large variety and prices will be reasonable.

There will be a Community Auction sale at the Borden School Yards at Sexsmith on Saturday, December 2nd. See another column for further particulars.

The town was flooded the other day, but it appears to be a case of loves labor lost, as what little ice that was on the ground disappeared owing to the mild weather.

Young Joey Shannon, eldest son of Mr. and Mrs. J. Shannon, returned from G.P.M. on the end of last week, after a stay of a few days. On enquiring from Joey's brother, Dennis, just what was the secret of Joey's success, he said that he was not sure, but thought that it was "Romantic Fever." This is a very serious malady, especially in young men, and is very dangerous at times. Who is the young lady anyway?

Fred Meen, youngest son of Mr. and Mrs. John Meen of Sexsmith, returned home on Friday last. Fred has been with the young men's government corps, serving at the Spirit River, since the first of August and is looking in the pink.

Keep in mind that Emmanuel Church is a bazaar and sale of home cooking and tea, Sat., Nov. 25, in building just immediately north of Bird's grocery store. They will have been recovered and ready to the owners. Mr. A. Foss has one still in his possession, which he has

recovered, but as yet the owner has not claimed it. The car has a plated seat in the front, and if the owner will see Mr. Foote and prove his property, coat will be returned to him.

As the wholesale grabbing, one prosecution has already taken place. This will probably make people more sure that they have their own property when leaving the land.

SCENIC HEIGHTS

SCENIC HEIGHTS, Nov. 17.—The weatherman has been on his best behavior this past week, the weather being generally fair and moderately cold. Roads are dry and the weather condition for travelling now than that have been this past two months. We hope the weather continues fine for us.

On Wednesday evening, November 15, the Scenic Heights beef ring held its 20th annual meeting with most of the members in attendance. It was decided that this had been one of the ring's most successful years. The meat obtained was the best with many exceptions, which were under weight. The same executive was re-elected. Mr. Eli Powell was president, Mr. O. J. Anderson, vice-president, and E. Harvey, treasurer. As this was Mr. Harvey's 20th year as butcher, the association presented him with a club pin as a token of their appreciation. Mr. Harvey thanked the association in his usual capable manner.

Church service was held in the hall last Sunday with only two families present. The next service will be on Sunday, Nov. 26. If there are no more members to this church services will be cancelled for a while. We hope for a better attendance on Sunday.

FAUST NEWS

SAULT, Nov. 21.—Rev. and Mrs. S. M. Faust and baby of High Prairie made to Faust last Sunday where Mr. West conducted the day services. In the evening he conducted baptismal ceremony where the following children were baptised: Patricia May Frood, Patricia Jane Rutherford, and William Rutherford.

Miss Irene Kenny who has been attending the High Prairie high school spent Thanksgiving in Faust.

Miss Stockford has arrived to take over the duties of deaconess at Faust.

Verne Fletcher sat on a week-end from the Edmonton.

Quite a number of Faust residents took in Mr. and Mrs. Edgar Hill's wedding dinner at Kinuso. All reported a good time.
